

C-MED

Power that respects your skin

CLINITA[™]
Clinical Tattooing System

Imagine...

Imagine holding a tool that responds to your every movement with ***absolute precision***.

A dermograph that allows you to work with the same confidence on young and mature skin, on delicate eyeliner and ***complex medical tattoos***.

The color flows evenly, is deposited with millimetric precision, and the treatment is completed in half the time, reducing skin stress and promoting faster healing.

Once healed, ***the result exceeds all expectations***: flawless lines, natural shades, and bright, long-lasting colors.

C-MED

what is it for

The world's first wireless dermograph equipped with the **Swiss Maxon micromotor**.

A concentration of precision engineering designed to give the dermopigmentist **total control** over every treatment.

Not just a simple tool, but an **integrated system** that combines power, versatility, and medical-grade reliability in a single device.

The Maxon micromotor uses gold components: precious materials that guarantee **extremely high power** even at minimum speeds, **superior durability**, and unparalleled smoothness of operation.

Why is C-MED different?

Uncompromising power

The Maxon micromotor delivers maximum power even at very low speeds. Less vibration, less stress on the skin, and more effective pigment deposition.

Intelligent dual console

Dual wireless battery for maximum freedom of movement, plus connection to an external console. You can choose how to work based on your needs.

Absolute versatility

Compatible with Clinita medical needles (surgical steel, individually sterilized, silicone grip, dermatologically tested) and universal bayonet needles. Two systems in one dermograph.

Why is C-MED different?

2–3.5 stroke adjustment

Adjusts the stroke to suit any technique: from soft eyeliner to medical tattoos or scar coverage.

Quietness and comfort

Ultra-quiet motor, zero vibrations, prolonged work without fatigue.

50% reduction in treatment time

Thanks to the efficiency of the Maxon motor, you can complete treatments in half the time compared to traditional dermographs.

24-month warranty

The reliability of Maxon micromotors allows us to offer an extended 24-month warranty—something that is hard to find on the market.

How do you use it?

Immediate and intuitive

The display on the battery shows you the voltage in real time: turn on the dermograph and adjust the power instantly.

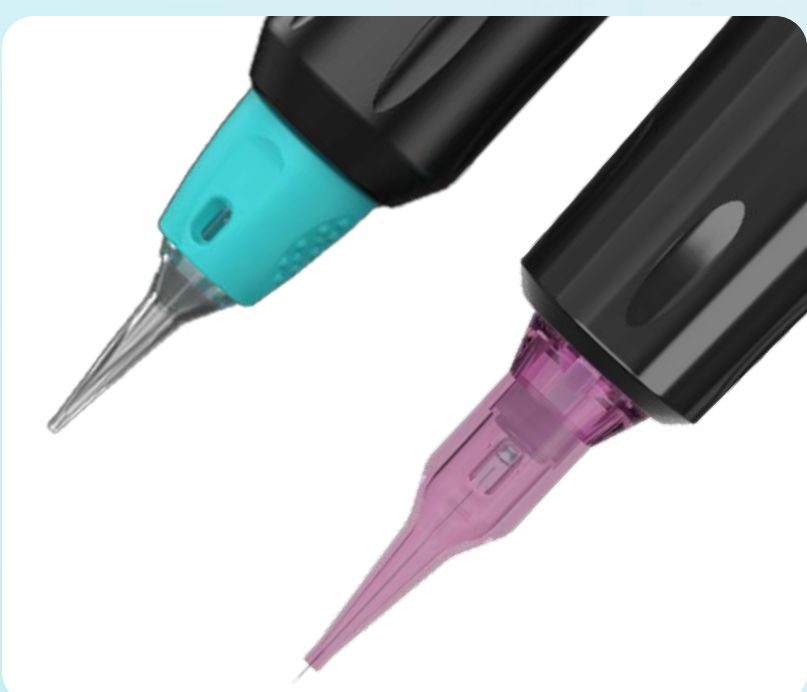

Wireless mode

Charge the dual battery, attach it to the dermograph, and work with total freedom of movement.

Cable mode

Connect the C-MED to the external console and work without autonomy limits on long treatments.

Needle system change

Remove the Clinitahead and replace it with the universal bayonet needle head. Switch from one system to another in just a few seconds.

Stroke and needle adjustment

The stroke is adjusted using a dedicated ring nut: from 2 mm (delicate treatments) to 3.5 mm (major treatments or paramedical tattooing). To adjust the needle, simply rotate it as you would with other Clinita dermographs.

Frequently asked questions

What is the Maxon micromotor and why is it so special?

Maxon is a Swiss company and world leader in the production of precision micromotors used in the medical, aerospace, and industrial sectors. The C-MED motor uses gold components, ensuring superior durability, constant power, and absolute reliability.

Can I use my usual needles?

Yes. The C-MED is compatible with both Clinita Fly medical needles (surgical steel, individually sterilized, silicone grip, dermatologically tested) and universal bayonet needles. Simply change the head in a matter of seconds.

How long does the battery last in wireless mode?

The dual battery guarantees extended autonomy for an entire working day. If you need unlimited autonomy, you can always connect the dermatograph to the external console.

Is C-MED autoclavable?

The body of the dermatograph follows standard sterilization protocols for medical-grade devices. Clinita needles are disposable and individually sterilized.

Frequently asked questions

What kind of treatments can I perform?

All:eyebrows, eyeliner, lips, tricopigmentation, scar camouflage, areola reconstruction, vitiligo coverage.The versatility of C-MED allows you to perform any technique with a single tool.

Why is the warranty 24 months?

The reliability of the Maxon micromotor allows us to extend the warranty to 24 months instead of the standard 12 months on the market. It is our statement of confidence in the quality of the product.
